

Interpreting (Even Tricky) Regression Coefficients

Dummy Coding Multi-Category Predictors: Main Effects and Interactions

Karen Grace-Martin

Dummy Coding Multi-Category Predictors: Main Effects and Interactions

1. Dummy Coding Multi-Category Predictors
2. Add a Numerical Predictor
3. Interactions With Multi-Category and Numerical Predictors
4. Interactions Between Two Dummy-Coded Variables

Dummy Coding Multi-Category Predictors

Dummy Coding Multi-Category Predictors

$$E(Y|X) = \beta_0 + \beta_1 X$$

Dummy Coding

X = 1 for comparison group (In Poverty)

X = 0 for reference group (Not in Poverty)

Dummy Coding Multi-Category Predictors

$$E(Y|X) = \beta_0 + \beta_1 X_1$$

Dummy Coding?

X = 1 for comparison group

X = 0 for reference group

1 Widowed

2 Divorced

3 Separated

4 Married

5 Never Married
